Be part of the green revolution in shipping, network for an emission-free future!

The Large Engines Competence Center LEC together with the Hamburg Port Authority and Flotte Hamburg invite you to the 2nd LEC Sustainable Shipping Technologies Forum which will take place in the **historic Speicherstadt in Hamburg** in parallel to the international maritime trade fair SMM.

The forum aims to foster the exchange of ideas, to harness synergies, to promote co-operations and **to network relevant actors** in the shipping sector for an emission-free future.

Participate in two days of stimulating discussions with internationally recognized

TOPICS

- Green ports & infrastructure
- Ship efficiency technologies
- Advanced propulsion & fuels
- Ship emission monitoring & compliance

experts in green shipping. The first forum took place in Graz in 2019, focusing on drastic emission reductions in line with the IMO targets for 2050. In order to strengthen joint efforts of all stakeholders addressing current and future sustainability challenges the forum will continue as an annual event series, alternately in Graz and Hamburg.

REGISTRATION

Registration via the LEC website opens in May 2020: www.LEC.at

Are you interested to contribute to the forum? Please contact us regarding **networking and sponsorship opportunities**.
